World's First 1cm Seat Rail

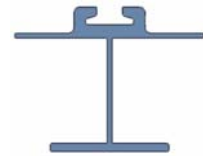

New Fittings (4x3 lips)

The 1 cm seat rail offers the following advantages over the conventional 1" rail:

- Improved revenues due to extra seat row(s)
- Installed seats and monuments with double accuracy over conventional 1" seat rails
- Reduced vibration, reduced maintenance
- More robust design over 1" seat rail
- Visually better appearance
- Update old and corroded standard seat rails
- Retrofit legacy aircraft

Original Part

The 1 cm seat rail is available as:

- a) Standard part in new aircrafts
- b) Adaptive 1cm seat rail for targeted areas (business, economy). Customer to specify length i.e. for 2, 3, 4, etc. seat rows

New Part
